The Container – Le Conteneur

The container is a vital tool in today's global world. In containers, raw materials and manufactured goods can be transported around the world, at sea, by truck and on rail wagons.

The typical container is either a 20 foot container or a 40 foot container. It can be a dry container or a refrigerated container or a special container, like a flat-rack container.

The container and low-cost, reliable shipping in combination with efficient container terminals and the vast infrastructures of motorways and railroads make up the most important transport system in the world. Maersk Line provides its customers with the world's most reliable services.

Der Container ist aus der heutigen globalisierten Welt nicht mehr wegzudenken. Mithilfe von Containern können Rohstoffe und hergestellte Waren weltweit über den Seeweg, die Straße oder per Bahn transportiert werden.

Der typische Container ist entweder ein so genannter „20-Fuß-Container“ mit ca. 6 Metern Länge oder ein „40-Fuß-Container“ mit etwas über 12 Metern Länge. Neben Trockencontainern und Kühlcontainern gibt es auch spezielle Container wie zum Beispiel den Flachcontainer.

Der Container und der kostengünstige Transport bilden in Verbindung mit leistungsstarken Container-Terminals und einer riesigen Infrastruktur aus Bahn- und Straßennetz eines der wichtigsten Transportsysteme der Welt. Die Maersk Line bietet ihren Kunden einen der weltweit zuverlässigsten Dienste.

Le conteneur est un outil vital dans le monde globalisé d'aujourd'hui. Grâce aux conteneurs, les matières premières et les produits finis peuvent être transportés dans le monde entier par bateau, par camion et sur des wagons de train.

Le conteneur typique mesure soit 20 pieds (6 mètres), soit 40 pieds (12 mètres). Il peut être sec, réfrigéré ou spécial, par exemple un conteneur plateforme.

Les conteneurs et un transport maritime fiable à faible coût, combinés avec des terminaux pour conteneurs efficaces et de vastes infrastructures d'autoroutes et de voies ferrées composent le système de transport le plus important au monde. Maersk Line fournit à ses clients les services les plus fiables au monde.

El contenedor es una herramienta fundamental para el mundo globalizado actual. Los contenedores permiten transportar materias primas y artículos manufacturados a todas partes del mundo, en barco, en camión y en ferrocarril.

Un contenedor típico mide 20 o 40 pies. Puede ser un contenedor seco, refrigerado o especial, como los de plataforma.

Al representar un medio de transporte barato y seguro, y contar con eficaces terminales de contenedores y vastas redes de carretera y ferrocarril, el contenedor es el sistema de transporte más importante del mundo. Maersk Line presta a sus clientes los servicios más seguros del mundo.

O contentor é uma ferramenta vital no mundo globalizado de hoje. Graças aos contentores, matérias primas e bens manufaturados podem ser transportados para toda a parte do mundo, por mar, camião e por caminhos de ferro.

Entende-se por **contentor normal**, um contentor com 20 pés ou 40 pés. Pode ser um contentor seco, refrigerado ou especial, tal como um contentor de caixa aberta.

O contentor e o transporte de confiança barato, combinados com os terminais eficientes para contentores e a vasta infraestrutura de autoestradas e caminhos de ferro tornam-no o mais importante sistema de transporte do mundo. A Maersk Line oferece aos seus clientes os serviços de maior confiança a nível mundial.

A konténer létfontosságú szerepet tölt be napjaink globalizált világában. Konténerekben lehet szállítani világszerte a nyersanyagokat, a készárakat tengeren, kamionokon és vasúti kocsikon.

A tipikus konténer lehet 20 lábás vagy 40 lábás konténer. Ez lehet száraz konténer vagy hűtött konténer, esetleg speciális konténer, mint például a nyitott konténer.

A konténer és az alacsony költségű, megbízható szállítás a hatékony konténer terminálokkal és az autóutak és vasutak óriási infrastruktúrájával a világ legfontosabb szállítási rendszerét alkotja. A Maersk Line a világ legmegbízhatóbb szolgáltatásai nyújtja felhasználóinak.

CHALLENGE:
Build a LEGO® model interpretation of the world's largest ship

HERAUSFORDERUNG:
Ein LEGO® Modell bauen, das vom größten Schiff der Welt inspiriert ist

DÉFI :
Construis un modèle LEGO® du plus grand bateau du monde

ACEPTA EL DESAFÍO:
Construye el barco más grande del mundo al estilo LEGO®

DESAFIO:
Constrói o modelo LEGO® que é a interpretação do maior barco do mundo

KIHÍVÁS:
Építsd meg a világ legnagyobb hajójának LEGO® modelljét

Designer building the model
Der Designer bei der Arbeit
Designer construisant le modèle
El diseñador construye el modelo
Designer a construir o modelo
Tervező a modell építése közben

Authenticity down to placing a good-luck coin under the mast

Authentizität bis ins letzte Detail: die Münze am Mast

L'authenticité va jusqu'à placer une pièce porte-bonheur sous le mât

Máximo realismo: coloca una moneda de la buena suerte bajo el mástil

Autêntico ao ponto de ter uma moeda de boa sorte sob o mastro

Hitelesség, egészen az árboc alatti szerencse érme elhelyezéséig.
