# LE COLISÉE

III

Jamie Berard, responsable du design, et Rok Zgalin Kobe, designer LEGO®

## LES MOTS DE L'ÉQUIPE DE DESIGN

Pour le responsable du design, Jamie Berard, il y avait maintes bonnes raisons de choisir le Colisée : « C'est un lieu d'une grande importance tant sur le plan historique que sur le plan architectural, et il fait partie des sets qu'on nous a le plus demandés. Mais c'est surtout un modèle LEGO® impressionnant et inspirant qui doit être à la fois amusant et difficile à construire ! »

Avant de devenir designer LEGO, Rok Zgalin Kobe était architecte, d'où son souhait de reproduire une icône de l'architecture en briques LEGO : « Le Colisée a toujours été en tête de ma liste de créations LEGO à réaliser ! J'ai commencé par construire les murs extérieurs incurvés et j'ai gardé la même échelle pour la suite. Au départ, nous n'avions pas l'intention de créer le plus grand modèle LEGO de tous les temps, mais plus un modèle est perfectionné, plus le nombre de pièces nécessaires pour restituer les détails est élevé. »

Le Colisée compte 3 types de colonnes : dorique, ionique et corinthienne. Elles sont toutes reproduites fidèlement dans le modèle LEGO®.

## UNE AMPLEUR COLOSSALE

S'il avait été construit à l'échelle exacte, ce modèle LEGO® Creator Expert n'aurait pas été aussi grand. Rok Zgalin Kobe, designer senior chez LEGO, a eu recours à l'exagération verticale, une technique souvent utilisée pour les cartes topographiques, afin de souligner l'impressionnante verticalité du vrai Colisée.

Bien que plus haut, le modèle LEGO® devait toutefois restituer avec précision la section transversale de la structure d'origine pour reproduire fidèlement la forme ovale, notamment grâce à la création de nombreuses arches sur les 3 étages inférieurs.

Pour recréer les volutes de la colonne ionique, le concepteur LEGO® a utilisé un élément de patin à roulettes LEGO qui existait déjà.
