# HEAD OF OPERATIONS

***“All troops will debark for ground assault. Prepare to target the main generator.”***

- General Veers

The head of the AT-AT walker serves as the cockpit and command centre for General Veers and several other minifigure characters. Full of details inside and out like lamps, firing controls, periscope display, a weapons system with rotating medium blaster cannons and Class II heavy laser cannons that recoil when ‘fired’, it’s the operational brains of any Imperial ground attack.

The challenge here was to replicate the design faithfully while allowing the neck to move like the movie model. Standard cross axles were not stable or flexible enough, but Henrik and Markus discovered that crane arm elements (long cross axles with LEGO® Technic holes at each end) were just pliable enough to achieve the desired snake-like movement effect, and strong enough to hold the weight of the head.

# A WALK ON THE DARK SIDE

From mini-builds to grand collectibles, LEGO® *Star Wars* AT-AT walkers have come in all sizes over the years, each deserving of a place in our Hall of Fame on its own merits. Every walker along the way has taken new steps and pushed our limits in building techniques and design and led us to this mammoth of a model you're building now. More details than ever. More functions than ever. An undisputed heavyweight champion of LEGO *Star Wars* display models. Get ready for a walk on the dark side.
