## WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

## NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

## QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

# A RARE GEM IN THE ULTIMATE COLLECTOR SERIES

When the first *Star Wars* movies were released, fans were awestruck by the high level of detail and authentic looks of the starship fleets in this intriguing galaxy. Rugged or pristine, they often have as much personality as the live characters. Ever since the first LEGO® *Star Wars*™ sets were released in 1999, we have shared that love of the saga with fans of all ages and recreated its starships and vehicles in various scales. Rebel or Imperial, we keep every set as authentic-looking and detailed as possible.

The TIE Interceptor, infamous for its role in the Battle of Endor, was released as part of our first Ultimate Collector Series in 2000. It became an instant fan favorite. To celebrate our 25<sup>th</sup> anniversary, we're relaunching it in a new and even more detailed version.

Enjoy building!

**Jens Kronvold Frederiksen**  
Creative Director, LEGO® *Star Wars*™

## UNE PERLE RARE DANS LA SÉRIE DE COLLECTION SUPRÊME

À la sortie des premiers films de *Star Wars*, les amateurs ont été époustoufflés par le niveau de détail et d'authenticité des flottes de vaisseaux de cette galaxie fascinante. Robustes ou immaculés, ils ont souvent autant de personnalité que les personnages vivants. Depuis le lancement des premiers ensembles LEGO® *Star Wars*™ en 1999, nous avons partagé cet amour de la saga avec des passionnés de tous âges et recréé ses vaisseaux et ses véhicules à différentes échelles. Qu'il s'agisse des forces rebelles ou impériales, nous veillons à ce que chaque ensemble soit aussi authentique et détaillé que possible.

L'intercepteur TIE, célèbre pour son rôle dans la bataille d'Endor, a été lancé dans le cadre de notre première Série de collection suprême en 2000. Il a immédiatement conquis les amateurs. Pour célébrer notre 25<sup>e</sup> anniversaire, nous le relançons dans une nouvelle version encore plus détaillée.

Bonne construction !

**Jens Kronvold Frederiksen**  
Directeur de la création, LEGO® *Star Wars*™

## UNA RARA GEMA DE LA SERIE ULTIMATE COLLECTOR SERIES

Cuando se estrenaron las primeras películas de *Star Wars*, los fans quedaron sorprendidos por el gran nivel de detalle y el auténtico aspecto de las flotas de naves espaciales de esta enigmática galaxia. Desgastadas o impecables, con frecuencia tienen tanta personalidad como los personajes vivos. Desde el lanzamiento de los primeros sets LEGO® *Star Wars*™ en 1999, hemos compartido ese amor por la saga con fans de todas las edades, recreando sus naves espaciales y vehículos en diversas escalas. Ya sean rebeldes o imperiales, mantenemos el realismo de la apariencia y los detalles de cada set tanto como resulta técnicamente posible.

El Interceptor TIE, tristemente célebre por su papel en la batalla de Endor, salió a la venta como parte de la primera generación de sets de nuestra colección Ultimate Collector Series en 2000 y, de inmediato, se convirtió en un favorito de los fans. Para celebrar nuestro 25 aniversario, decidimos relanzarlo en una nueva versión aún más detallada.

¡Que disfrutes construyendo!

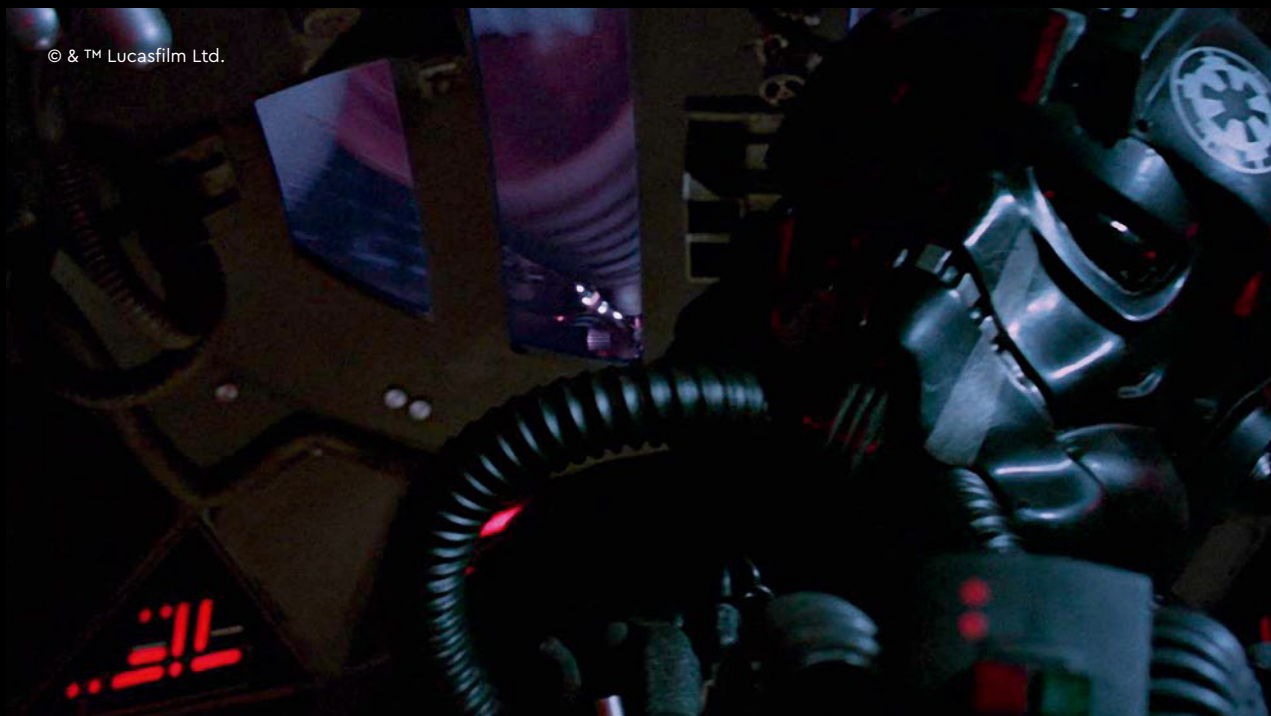

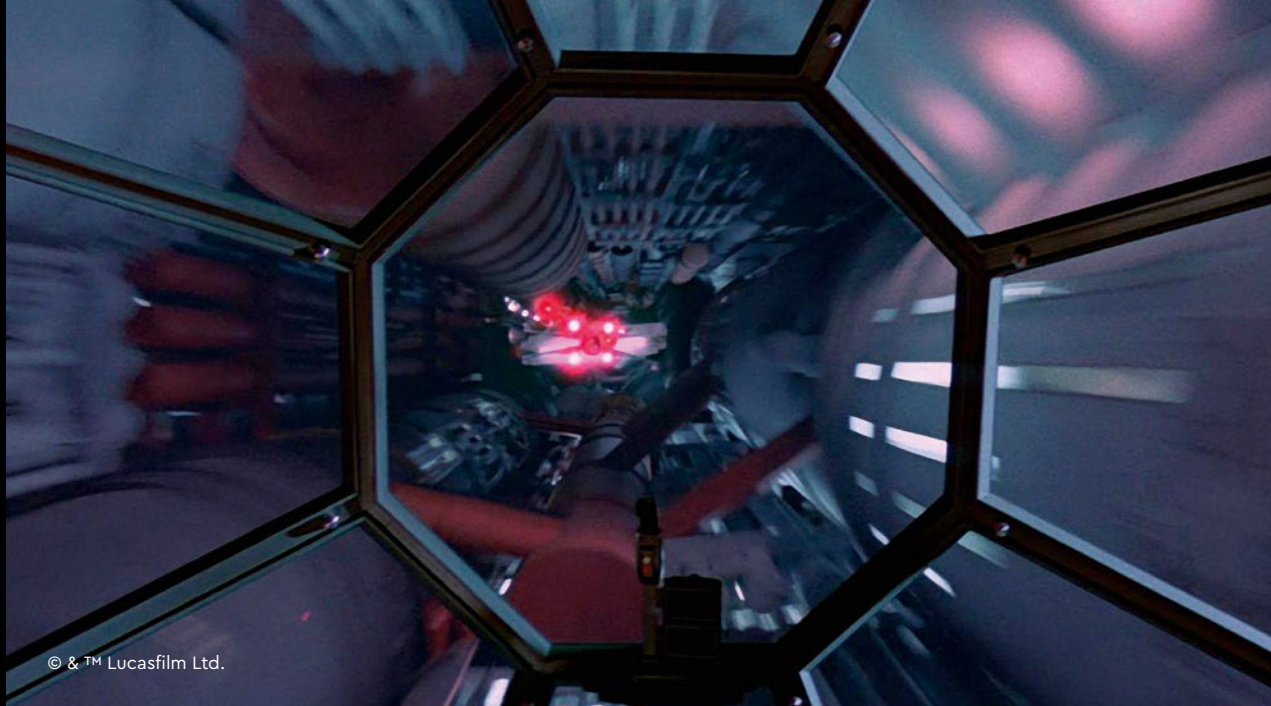

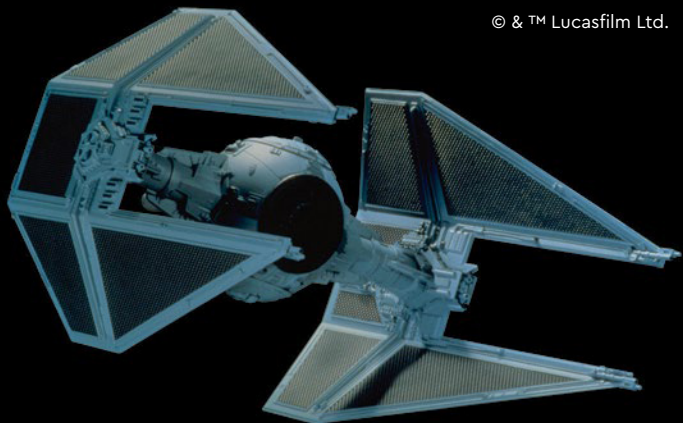

**Jens Kronvold Frederiksen**  
Coordinador creativo, LEGO® *Star Wars*™

# THE TIE INTERCEPTOR

Size matters not when it comes to the TIE Interceptor. At 7.7 meters/25 ft. 3 in., it is designed for maximum speed and agility in battle. Originally employed by Palpatine's Galactic Empire, the Interceptor is faster and more maneuverable than other TIE fighters of its time. A new dagger-shaped wing design with large solar panel areas provides the necessary additional power for the large twin ion engines. To enhance performance in battle, Imperial designers increased firepower with four Siemar Fleet Systems L-s9.3 laser cannons and mounts for optional extra laser cannons.

While the TIE Interceptor boasts impressive armament and power, other essential design features had lower priority. With no hyperdrive system, minimal armor and no deflector shield, its strength lies in numbers – and the skills of its pilots. During the Battle of Endor, a swarm of TIE Interceptors proved a formidable fleet for the Rebellion's A-wings in particular.

# L'INTERCEPTEUR TIE

Lorsqu'il est question de l'intercepteur TIE, la taille n'a pas d'importance. D'une longueur de 7,7 mètres, il est conçu pour offrir une vitesse et une agilité maximales au combat. Utilisé à l'origine par l'Empire galactique de Palpatine, l'intercepteur est plus rapide et plus maniable que les autres chasseurs TIE de l'époque. La nouvelle conception des ailes, avec de grands panneaux solaires pointus, fournit l'énergie supplémentaire nécessaire aux doubles moteurs ioniques. Pour une meilleure performance au combat, les concepteurs impériaux ont augmenté la puissance de feu avec quatre canons laser L-s9.3 conçus par les Systèmes de Flotte Sienar et des supports pour des canons laser supplémentaires.

L'intercepteur TIE est doté d'un armement et d'une puissance impressionnants, mais d'autres caractéristiques essentielles ont été sacrifiées. Avec un blindage minimal et sans hyperpropulseur ni bouclier déflecteur, l'intercepteur tire sa force dans le nombre ainsi que dans les compétences de ses pilotes. Lors de la bataille d'Endor, une nuée d'intercepteurs TIE s'est révélée être une flotte redoutable, particulièrement pour les chasseurs A-Wing de la Rébellion.

# EL INTERCEPTOR TIE

El tamaño no importa cuando se trata del Interceptor TIE. Con una longitud de 7,7 m, está diseñado para ser extremadamente veloz y maniobrable en combate. Utilizado originalmente por el Imperio Galáctico de Palpatine, el Interceptor supera en rapidez y agilidad a otros cazas TIE de su época. El novedoso diseño de las alas, con forma de daga y amplias zonas de celdas solares, proporciona la energía adicional necesaria para impulsar los grandes motores de iones gemelos. Para mejorar su desempeño en combate, los diseñadores del Imperio aumentaron su potencia de fuego con cuatro cañones láser L-s9.3 fabricados por Sistemas de Flota Sienar y soportes para cañones láser adicionales opcionales.

Si bien el Interceptor TIE destaca por su impresionante armamento y potencia, también es notable la poca prioridad que se dio a otras características esenciales en su diseño. Desprovisto de un sistema hiperpropulsor y escudo deflector, y con un blindaje mínimo, su fuerza reside en la superioridad numérica y la habilidad de sus pilotos. Durante la batalla de Endor, un enjambre de Interceptores TIE demostró ser una flota formidable, sobre todo frente a los A-wing de la Rebelión.

# MEET THE MODEL DESIGNER

"In 1999, I began working on what would become the first LEGO® Star Wars™ Ultimate Collector Series version of the TIE Interceptor. This model is a redesigned version of the starship, hopefully with equal parts authenticity and engaging design, wrapped in a fun building experience!"

"The Interceptor's design and story are quite unique. If the Empire had not fallen in the Battle of Endor, this would have been the mass-produced successor to Darth Vader's TIE Advanced x1 prototype. The cutaway wing design means that (at least in the movie version), the starship is lighter and more aerodynamic. The pilot's lateral vision is improved compared to previous TIE models, giving the Imperial Navy an edge in star battles against the Rebels."

"The model is mounted on a stand with a 25<sup>th</sup>-anniversary plaque. The TIE Pilot minifigure with a new arm print is exclusive to this set. The miniature brick-built Mouse Droid is one we often see in Imperial and First Order hangars, bases and starships."

Design Master Henrik Andersen's first LEGO® Star Wars™ TIE Interceptor (7181) from 2000, and the new model (75382)  
Le premier intercepteur TIE LEGO® Star Wars™ (7181) du maître concepteur Henrik Andersen en 2000, ainsi que le nouveau modèle (75382)  
El primer Interceptor TIE (7181) LEGO® Star Wars™ creado por el maestro de diseño Henrik Andersen en 2000 y el nuevo modelo (75382).

LEGO® Star Wars™  
Design Master

## RENCONTRE AVEC LE CONCEPTEUR DU MODÈLE

« En 1999, j'ai commencé à travailler sur ce qui allait devenir la première version LEGO® Star Wars™ Série de collection suprême de l'intercepteur TIE. Ce modèle est une version redessinée du vaisseau, offrant à la fois authenticité et conception attrayante pour une expérience de construction gratifiante.

La conception et l'histoire de l'intercepteur sont tout à fait uniques. Si l'Empire n'était pas tombé lors de la bataille d'Endor, ce modèle aurait été le successeur en série du prototype TIE Avancé x1 de Darth Vader. La conception des ailes en coupe signifie que le vaisseau est plus léger et plus aérodynamique (du moins dans la version cinématographique). La vision latérale du pilote est améliorée par rapport aux modèles de TIE précédents, ce qui donne à la marine impériale un avantage dans les batailles stellaires contre les Rebelles.

Le modèle est monté sur un socle avec une plaque du 25<sup>e</sup> anniversaire. La figurine de pilote de TIE avec un nouveau bras imprimé est exclusive à cet ensemble. Le petit droïde souris est souvent aperçu dans les hangars, les bases et les vaisseaux de l'Empire et du Premier Ordre. »

**Henrik Andersen,**  
maître concepteur  
LEGO® Star Wars™

## CONOCE AL MODELISTA

"Fue en 1999 cuando empecé a trabajar en lo que se convertiría en la primera versión LEGO® Star Wars™ Ultimate Collector Series del Interceptor TIE. Espero que este modelo rediseñado de la icónica nave espacial logre reproducir la autenticidad y el atractivo del primer set, así como su divertida experiencia de construcción!".

"El diseño y la historia del Interceptor son muy singulares en muchos sentidos. Si el Imperio no hubiera caído en la batalla de Endor, este habría sido el sucesor producido en serie del TIE Avanzado X1, cuyo prototipo puso a prueba el mismísimo Darth Vader. El diseño con alas cortadas hace que la nave espacial (al menos la versión que pudimos ver en la pantalla grande) sea más ligera y aerodinámica. La visión lateral del piloto mejora en comparación con los modelos anteriores del caza TIE, lo que da a la Naval Imperial una ventaja en las batallas espaciales contra los rebeldes".

"El modelo se monta sobre una base con una placa conmemorativa del 25 aniversario. La minifigura del piloto de caza TIE, con novedosas impresiones en los brazos, es exclusiva de este set. El droïde ratón en miniatura construido con bricks es una imagen frecuente en hangares, bases y naves espaciales imperiales y de la Primera Orden".

**Henrik Andersen,**  
maestro de diseño de  
LEGO® Star Wars™

# INNOVATIVE IMPERIAL DESIGN

- Behind the transparisteel viewport is a fully equipped cockpit with features characteristic of the TIE-fighter-class starships
- Open the top hatch to see the pilot's seat
- Detailed octagonal engine section with inside greebling
- Unique new LEGO® building techniques were used to achieve a more authentic replica of the sphere-shaped exterior, compared to previous LEGO TIE fighters
- Train wheel elements in a new gray color represent the wing struts
- Angled hinges and 32 new 2x4 sloped elements without studs were used to frame the bent-wing solar wings
- The two shovels representing the advanced targeting sensors were also featured in the original UCS model from 2000 – the first time a special element was used for a purpose other than its original use
- Whereas TIE Fighters have twin chin-mounted lasers, the TIE Interceptor's four wingtip blaster cannons are attached to its solar arrays
- The rear of the wings is densely constructed, and the wingtips are slightly more hollow to ensure optimal weight distribution

## UNE CONCEPTION IMPÉRIALE NOVATRICE

- Derrière une fenêtre en transparent se trouve un habitacle entièrement équipé avec des caractéristiques propres aux vaisseaux de la classe TIE.
- Ouvrez la trappe supérieure pour voir le siège du pilote.
- Une section de moteur octogonale détaillée, avec des détails ornementaux à l'intérieur.
- De nouvelles techniques de construction LEGO® uniques ont été utilisées pour reproduire plus fidèlement l'extérieur sphérique des chasseurs TIE LEGO.
- Les éléments de roue du train dans une nouvelle couleur grise représentent les montants de l'aile.
- Des charnières angulaires et 32 nouveaux éléments 2x4 inclinés sans montants ont été utilisés pour structurer les ailes solaires en forme d'ailes courbées.
- Les deux pelles représentant les capteurs de ciblage avancés figuraient également dans le modèle original de la Série de collection suprême de 2000. C'était la première fois qu'un élément spécial était utilisé à d'autres fins que celles pour lesquelles il avait été conçu.
- Alors que les chasseurs TIE sont équipés de deux lasers montés sur le menton, les quatre canons blasters des intercepteurs TIE sont fixés aux panneaux solaires aux bouts des ailes.
- L'arrière des ailes est densément construit et les extrémités des ailes sont légèrement plus creuses afin d'assurer une répartition optimale du poids.

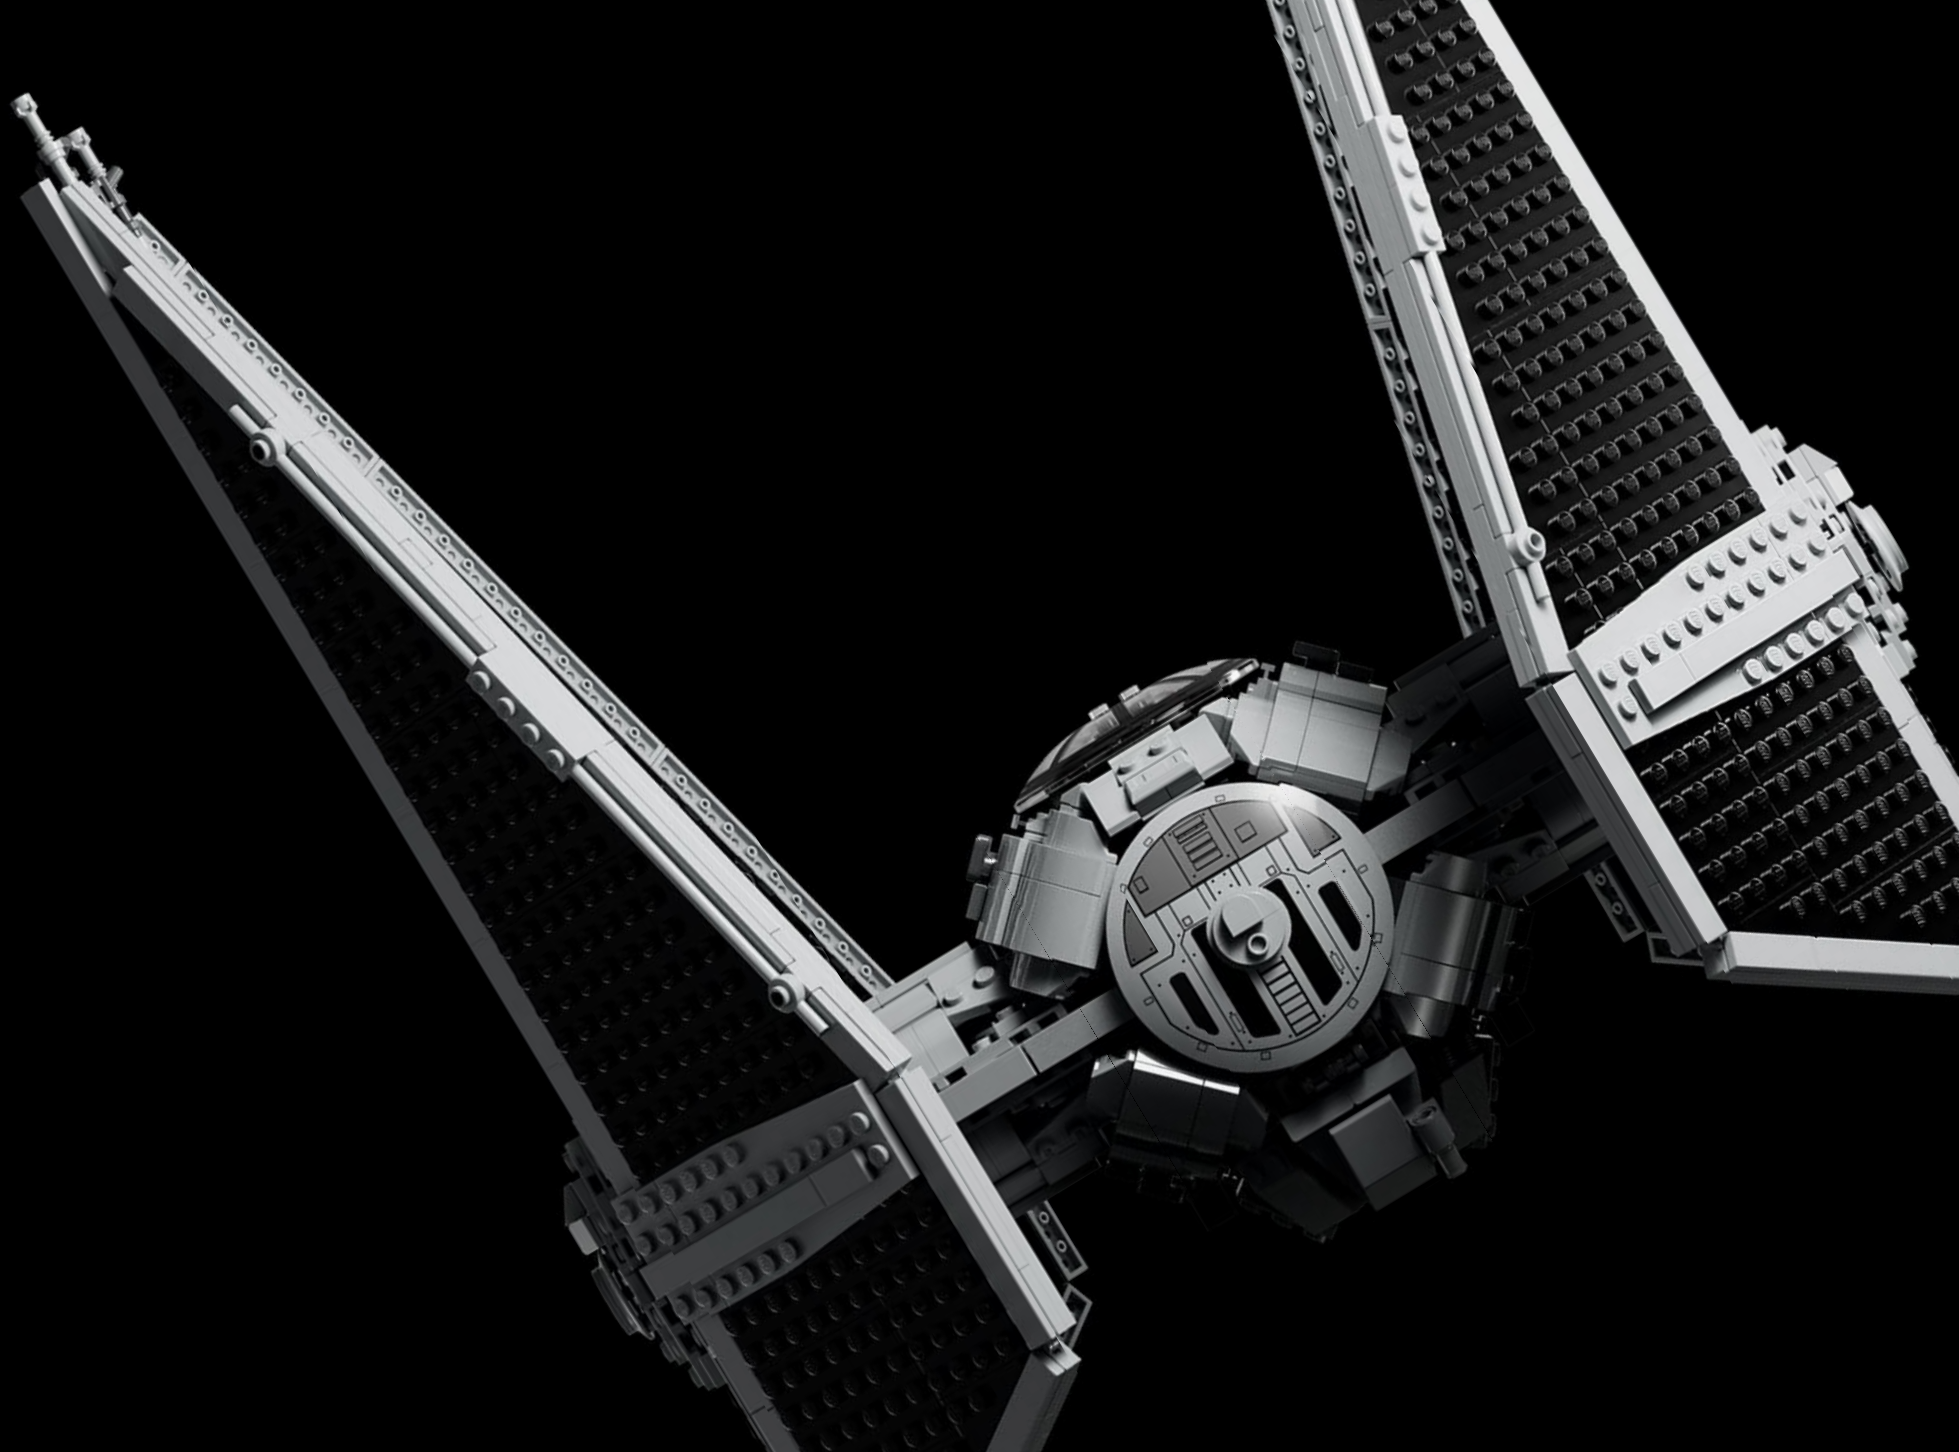

## INNOVADOR DISEÑO IMPERIAL

- Detrás de la ventanilla de Transpariacero hay una cabina totalmente equipada con elementos característicos de los cazas estelares TIE.
- La escotilla superior se abre para contemplar el asiento del piloto.
- En el interior de la detallada sección octagonal del motor se aprecia el uso de la técnica de sobrecarga.
- Se utilizaron nuevas y exclusivas técnicas de construcción con LEGO® para reproducir el exterior esférico con aún más autenticidad que en los modelos LEGO de cazas TIE del pasado.
- Los soportes de las alas se recrean mediante elementos que representan ruedas de tren en un nuevo tono de gris.
- Se utilizaron bisagras en ángulo y 32 nuevos elementos inclinados 2x4 sin espigas para enmarcar las alas facetadas con celdas solares.
- Las dos palas que representan los sensores avanzados de seguimiento de objetivos también aparecían en el modelo UCS original de 2000; este hecho marcó la primera vez que se utilizó un elemento especial para un fin distinto de su uso original.
- Mientras que los cazas TIE cuentan con dos rayos láser instalados por debajo de la línea de la ventanilla, el Interceptor TIE cuenta con cuatro cañones bláster fijados a sus paneles solares.
- A diferencia de las puntas de las alas, que son más huecas, la parte posterior de estas cuenta con una alta densidad de elementos a fin de garantizar una distribución óptima del peso.
